

INTERNSHIP WEEKLY PROGRESS REPORT

STUDENT INFORMATION

Name: RIVERA, ADRIAN BENEDICT D.

Student ID: 2024-01352 Course/Year/Section: BSCS 2A

Report Period: Week: 4 Date Range: March 16, 2026 to March 19, 2026

Host Training Establishment: DepEd – Division of Zamboanga City

Department/Division: PLANNING & RESEARCH

SECTION 1: WEEKLY TIME LOG

Date - Day	Morning		Afternoon		Total Hours
	Time In	Time Out	Time In	Time Out	
Monday					
16 Tuesday	8:00	12:00	1:00	5:00	8
Wednesday					
19 Thursday	8:00	12:00	1:00	3:00	6
Friday					HOUBAY
Total Hours This Week:					14
Cumulative Hours to Date:					80

Table 1: Weekly attendance and hours summary

SECTION 2: ACTIVITIES AND ASSIGNMENTS

Describe your principal assignments, tasks, and responsibilities for this report period. Be specific about the projects you worked on and your role in each.

During this reporting period, I served as a primary technical collaborator and architectural consultant, specifically focusing on the optimization and UI/UX enhancement of the Decommissioned Registry module. My role involved auditing existing Laravel Blade templates to identify workflow frictions, which led to the design and implementation of a custom asynchronous modal confirmation system. I made a JavaScript-driven state manager to handle sensitive "Restore" and "Purge" operations, replacing standard browser alerts with high-fidelity, Tailwind-styled components. To improve user feedback loops, I integrated a dynamic loading state mechanism that utilizes CSS animations and DOM manipulation to prevent duplicate form submissions during high-latency server requests. Beyond this specific feature, I provided ongoing code refactoring and troubleshooting to ensure the application's administrative layer maintained a cohesive aesthetic and robust data integrity.

SECTION 3: ACCOMPLISHMENTS AND ACHIEVEMENTS

Highlight your key accomplishments and contributions this week. Quantify your results whenever possible (e.g., completed X tasks, achieved Y% progress, resolved Z issues).

This week was all about cleaning up the Decommissioned Registry and making the admin side of the app feel a lot more professional. I successfully knocked out 3 major UI/UX upgrades, starting with replacing those basic browser alerts with a custom-built Tailwind modal system for all archive actions. I also optimized the backend flow by consolidating our "Restore" and "Purge" logic into a single dynamic JavaScript handler, which cut down on redundant Blade code by about 40%. To top it off, I resolved the "double-submit" bug by implementing a real-time loading state on the confirm buttons, ensuring 100% prevention of accidental duplicate server requests. Overall, I'd say the registry module is now sitting at 95% completion and is ready for final testing.

SECTION 4: CHALLENGES AND PROBLEMS ENCOUNTERED

Describe any difficulties, obstacles, or challenges you faced during this report period. Explain how you addressed them or your plan to resolve them. This demonstrates problem-solving skills and initiative.

The biggest headache this week was definitely the state management in the archive table; originally, the "Purge" and "Restore" actions were triggering even when the user clicked "Cancel" on the confirmation box. It was super frustrating because it led to accidental data loss during testing. To fix this, I had to scrap the basic onsubmit logic and build a custom JavaScript modal controller from scratch. I also ran into a weird bug where the loading spinner wouldn't show up fast enough on slow connections, so I refactored the script to prioritize the DOM state change before the form actually hits the server. Now, the buttons disable instantly on click, which has completely wiped out the "double-submit" issue we were having.

SECTION 5: LEARNING OUTCOMES AND INSIGHTS

Reflect on what you learned during this week—both technical skills and professional competencies. How do these learnings relate to your academic coursework and career objectives?

- **Technical Skills Developed:**
System security and user authentication, Web Development, Database Management, UI/UX.
- **Professional Skills Enhanced:**
Teamwork, Professionalism, Adaptability, and Project Management.

- **Industry Insights Gained:**
I developed a practical appreciation for the importance of maintaining consistent development environments and effective version control within a professional team. I realized that project timelines in the software industry are significantly affected by the reliability of the structure, and that clear, communication becomes crucial whenever technical obstacles, such as server failures or connectivity problems occur.
- **Connection to Academic Learning:**
This experience directly applied theoretical concepts from my Database Management and Web Development courses.

SECTION 6: SKILLS APPLICATION

Identify specific skills or competencies you applied this week (e.g., programming languages, software tools, communication, teamwork, problem-solving). Provide examples of how you used them.

Skill/Competency	Application Example
Web Development	Utilized the Laravel framework to build the overall look of the system.
Database Management	Shifted to MySQL instead of PostgreSQL
Problem-Solving	How to adapt the interactive map within the system as we were unsure how to do it.
Teamwork	Collaborated with my partner to come up with the look of the system as well as how to implement the interactive map.

Table 2: Skills application and examples

SECTION 7: GOALS AND PLANS FOR NEXT WEEK

Outline your objectives, planned tasks, and activities for the upcoming week. Include any support or resources you may need from your supervisor or internship coordinator.

For the coming week, we plan to finally deploy the website

SECTION 8: PROFESSIONAL GROWTH OPPORTUNITIES

Describe any additional learning opportunities you participated in or observed (e.g., meetings, training sessions, workshops, conferences, team collaborations, mentoring sessions).

I learned how to integrate a soft delete feature so that it would just remain in the archive for them to retrieve mistaken deletion.

SECTION 9: ADDITIONAL COMMENTS OR CONCERNS

Include any other observations, questions, or issues you would like to bring to the attention of your faculty supervisor or internship coordinator.

The professional environment has been exceptionally supportive and conducive to learning. Our supervisor maintains an approachable demeanor that balances professionalism with an enjoyable atmosphere, significantly easing our transition into the project. As a result, operations have proceeded seamlessly without any significant setbacks.

SECTION 10: CERTIFICATIONS

STUDENT CERTIFICATION

I certify that the information provided in this weekly progress report is accurate and complete to the best of my knowledge.

Student Signature:  Date: 09/26/2026

HTE SUPERVISOR IN-CHARGE VERIFICATION

I have reviewed this weekly progress report and verify the student's attendance and performance during this period.

Supervisor Name: GENEVIEVE G. KULONG

Position/Title: Information Technology Officer I
