

INTERNSHIP WEEKLY PROGRESS REPORT

STUDENT INFORMATION

Name: RIVERA, ADRIAN BENEDICT D.

Student ID: 2024-01352 Course/Year/Section: BSCS 2A

Report Period: Week 6 Date Range: March 31, 2026

Host Training Establishment: DepEd – Division of Zamboanga City

Department/Division: PLANNING & RESEARCH

SECTION 1: WEEKLY TIME LOG

Date - Day	Morning		Afternoon		Total Hours
	Time In	Time Out	Time In	Time Out	
Monday					
31 Tuesday	8:00	12:00	1:00	5:00	8
Wednesday					
Thursday					Holiday
Friday					Holiday
Total Hours This Week:					8
Cumulative Hours to Date:					110

Table 1: Weekly attendance and hours summary

SECTION 2: ACTIVITIES AND ASSIGNMENTS

Describe your principal assignments, tasks, and responsibilities for this report period. Be specific about the projects you worked on and your role in each.

My task was to redesign the "With Electricity" module within the school edit interface, transitioning it from a binary functional/non-functional toggle to a more detailed selection system that includes grid connection, solar power, generator, and hybrid options. I spent the day refactoring the Blade views to include these new dropdown parameters and high-contrast black border aesthetic to maintain a professional, institutional feel.

SECTION 3: ACCOMPLISHMENTS AND ACHIEVEMENTS

Highlight your key accomplishments and contributions this week. Quantify your results whenever possible (e.g., completed X tasks, achieved Y% progress, resolved Z issues).

I expanded the database architecture and front-end forms to track critical planning metrics, including a new chair inventory field and a detailed power-supply selection tool for grid, solar, generator, and hybrid specifications.

SECTION 4: CHALLENGES AND PROBLEMS ENCOUNTERED

Describe any difficulties, obstacles, or challenges you faced during this report period. Explain how you addressed them or your plan to resolve them. This demonstrates problem-solving skills and initiative.

During this report period, my primary challenge involved scaling the system's data architecture to support more granular infrastructure tracking, specifically when transitioning the "With Electricity" attribute from a simple boolean toggle to a multi-option selection. This created a significant obstacle for existing database records and required a carefully executed migration to convert column types to strings without causing data loss or application downtime. I addressed this by implementing a robust database migration and updating the controller logic to handle both legacy inputs and the new categories, such as Grid, Solar, and Hybrid systems.

SECTION 5: LEARNING OUTCOMES AND INSIGHTS

Reflect on what you learned during this week—both technical skills and professional competencies. How do these learnings relate to your academic coursework and career objectives?

- **Technical Skills Developed:**
System security and user authentication, Web Development, Database Management, UI/UX.
- **Professional Skills Enhanced:**
Teamwork, Professionalism, Adaptability, and Project Management.
- **Industry Insights Gained:**
I realized that the success of a project's timeline depends heavily on how reliable its underlying structure is, and I learned that maintaining open, clear communication is absolutely essential

- **Connection to Academic Learning:**
This experience directly applied theoretical concepts from my Database Management and Web Development courses.

SECTION 6: SKILLS APPLICATION

Identify specific skills or competencies you applied this week (e.g., programming languages, software tools, communication, teamwork, problem-solving). Provide examples of how you used them.

Skill/Competency	Application Example
Web Development	Utilized the Laravel framework to build the overall look of the system.
Database Management	Shifted to MySQL instead of PostgreSQL
Problem-Solving	How to adapt the interactive map within the system as we were unsure how to do it.
Teamwork	Collaborated with my partner to come up with the look of the system

Table 2: Skills application and examples

SECTION 7: GOALS AND PLANS FOR NEXT WEEK

Outline your objectives, planned tasks, and activities for the upcoming week. Include any support or resources you may need from your supervisor or internship coordinator.

For the coming week, we plan to include a feature where you can just upload a CSV file so that you don't need to manually input the data for each schools. I also plan to enhance the overlook and feel of the system for a better user experience.

SECTION 8: PROFESSIONAL GROWTH OPPORTUNITIES

Describe any additional learning opportunities you participated in or observed (e.g., meetings, training sessions, workshops, conferences, team collaborations, mentoring sessions).

I learned how to integrate an interactive map within the system using a JavaScript called leaflet as well as how to shift databases since we shifted from PostgreSQL to MySQL.

SECTION 9: ADDITIONAL COMMENTS OR CONCERNS

Include any other observations, questions, or issues you would like to bring to the attention of your faculty supervisor or internship coordinator.

I found the professional environment to be exceptionally supportive and conducive to developing my technical skills. My supervisor's approachable demeanor successfully balanced high standards of professionalism with an enjoyable atmosphere, which significantly eased my transition into the project's workflow. As a result, my assigned operations and tasks have proceeded seamlessly without any significant setbacks, allowing me to maintain steady progress on the system's development.

SECTION 10: CERTIFICATIONS

STUDENT CERTIFICATION

I certify that the information provided in this weekly progress report is accurate and complete to the best of my knowledge.

Student Signature:  Date: 04-07-2026

HTE SUPERVISOR IN-CHARGE VERIFICATION

I have reviewed this weekly progress report and verify the student's attendance and performance during this period.
