

INTERNSHIP WEEKLY PROGRESS REPORT

STUDENT INFORMATION

Name: RIVERA, ADRIAN BENEDICT D.

Student ID: 2024-01352 Course/Year/Section: BSCS 2A

Report Period: Week 7 Date Range: April 6, 2026 to April 10, 2026

Host Training Establishment: DepEd – Division of Zamboanga City

Department/Division: PLANNING & RESEARCH

SECTION 1: WEEKLY TIME LOG

Date - Day	Morning		Afternoon		Total Hours
	Time In	Time Out	Time In	Time Out	
Monday					
6 Tuesday	8:00	12:00	1:00	5:00	8
Wednesday					
9 Thursday					Holiday
10 Friday	8:00	12:00	1:00	5:00	8
Total Hours This Week:					16
Cumulative Hours to Date:					126

Table 1: Weekly attendance and hours summary

SECTION 2: ACTIVITIES AND ASSIGNMENTS

Describe your principal assignments, tasks, and responsibilities for this report period. Be specific about the projects you worked on and your role in each.

My tasks involved implementing minor UI refinements such as standardizing pagination to 10 items per page to reduce server lag and integrating an expandable "Data Trace" toggle using Alpine.js for cleaner audit log inspection. I was also responsible for professionalizing the system's reporting capabilities by developing a formal print protocol that automatically applies institutional branding, executive summaries, and validation footers to generated documents. Beyond the frontend, I worked on synchronizing the database schema with new registry fields for shortages and hazards, while troubleshooting technical environment issues like enabling the PHP intl extension to ensure all institutional metrics were formatted correctly for official use.

SECTION 3: ACCOMPLISHMENTS AND ACHIEVEMENTS

Highlight your key accomplishments and contributions this week. Quantify your results whenever possible (e.g., completed X tasks, achieved Y% progress, resolved Z issues).

I successfully executed 4 major UI/UX refinements, including the standardization of pagination to 10 items per page across all modules, which significantly improved server response times by preventing bulk data overloads. I achieved 100% completion in developing the Professional Print Protocol, which transformed raw data into formal government-standard reports featuring institutional branding and validation footers. Additionally, I resolved the critical "registry sync" failure by synchronizing the database schema with the new frontend fields and successfully executing a migration to add 7 missing columns, ensuring all shortage and hazard data points are now accurate in the MySQL environment.

SECTION 4: CHALLENGES AND PROBLEMS ENCOUNTERED

Describe any difficulties, obstacles, or challenges you faced during this report period. Explain how you addressed them or your plan to resolve them. This demonstrates problem-solving skills and initiative.

I encountered significant technical obstacles related to database synchronization and system performance that hindered the registry's reliability. The most critical challenge was a "column not found" error during school profile updates, which I diagnosed as a mismatch between the frontend forms and the backend MySQL schema. I took the initiative to resolve this by writing and executing a comprehensive database migration that added seven missing resource and deficit columns, successfully restoring full data persistence.

SECTION 5: LEARNING OUTCOMES AND INSIGHTS

Reflect on what you learned during this week—both technical skills and professional competencies. How do these learnings relate to your academic coursework and career objectives?

- **Technical Skills Developed:**
System security and user authentication, Web Development, Database Management, UI/UX.
- **Professional Skills Enhanced:**
Teamwork, Professionalism, Adaptability, and Project Management.

- **Industry Insights Gained:**
Standardizing development environments and maintaining strict version control are essential practices for effective teamwork in professional software development. My experience highlighted that project timelines are directly tied to the reliability of the system's core architecture. Furthermore, I learned that proactive and transparent communication is critical when navigating technical challenges, such as server failures or connectivity disruptions, to minimize their impact on productivity.
- **Connection to Academic Learning:**
This experience directly applied theoretical concepts from my Database Management and Web Development courses.

SECTION 6: SKILLS APPLICATION

Identify specific skills or competencies you applied this week (e.g., programming languages, software tools, communication, teamwork, problem-solving). Provide examples of how you used them.

Skill/Competency	Application Example
Web Development	Utilized the Laravel framework to build the overall look of the system.
Database Management	Used MySQL as our database
Problem-Solving	How to fully integrate a CSV import feature within the system and removing the bugs that followed
Teamwork	Collaborated with my partner to understand what other features we can implement as well as how to remove potential bugs and errors

Table 2: Skills application and examples

SECTION 7: GOALS AND PLANS FOR NEXT WEEK

Outline your objectives, planned tasks, and activities for the upcoming week. Include any support or resources you may need from your supervisor or internship coordinator.

For the coming week, we plan to enhance the code structure within our systems as well as the UI.

SECTION 8: PROFESSIONAL GROWTH OPPORTUNITIES

Describe any additional learning opportunities you participated in or observed (e.g., meetings, training sessions, workshops, conferences, team collaborations, mentoring sessions).

Always have an open mind when it comes to UI since not all share the same comfortability.

SECTION 9: ADDITIONAL COMMENTS OR CONCERNS

Include any other observations, questions, or issues you would like to bring to the attention of your faculty supervisor or internship coordinator.

I experienced a highly supportive professional environment that was instrumental in my development as a software engineering student. My primary responsibility was to maintain high standards of professionalism while integrating into the project workflow, which remained consistently smooth under my supervisor's approachable and positive leadership. This ideal atmosphere allowed me to transition seamlessly into my technical assignments and focus entirely on achieving my weekly project milestones without encountering any major obstacles. By working within this structured environment, I was able to demonstrate initiative and consistency in delivering my assigned tasks while successfully adapting to the professional expectations of the team.

SECTION 10: CERTIFICATIONS

STUDENT CERTIFICATION

I certify that the information provided in this weekly progress report is accurate and complete to the best of my knowledge.

Student Signature:  Date: 01/14/2020

HTE SUPERVISOR IN-CHARGE VERIFICATION

I have reviewed this weekly progress report and verify the student's attendance and performance during this period.

Supervisor Name: GENEVIEVE G. KULONG

Position/Title: Information Technology Officer I
